Coaching Youth Football is a 248-page, 8 1/2 x 11, paperback book Because it covers so much it cannot get into the depth you find in my offense and defense books. You have to teach fundamentals when it comes to the rules, safety, and the basics of various football actions like holding onto the football, keeping your head up, and so on. Coaching Youth Football is obviously more targeted at youth level but there is not much difference between the levels when it comes to special teams other than kick distances. The other youth football, or Pop Warner football, coaching books are quite politically correct and psychologically correct and tell you things like always be positive, focus on the fundamentals, make sure the players eat right, and speak of football generically without recommending any particular offense or defense. Offensive coordinators would be better off with the Single-Wing book although many offensive coaches have had great success just working out of the Coaching Youth Football book.
